MINE AND MILL RECLAMATION AND FACILITY DEMOLITION SERVICES

OVERVIEW

Envirocon has been a major service provider to the mining industry since its inception in 1988. We offer our clients excellence in safety, management, field execution, and quality. Envirocon has successfully completed mine reclamation projects at some of the most logistically challenging and environmentally sensitive sites in the country.

Envirocon's core competence in materials handling, coupled with our large fleet of owned equipment, makes Envirocon the best choice for mine and mill reclamation services. We strive to be the industry leader by providing safe, innovative, and cost effective solutions to complex environmental, geotechnical, and demolition projects for our mining sector clients.
