RADIOLOGICAL SERVICES

OVERVIEW

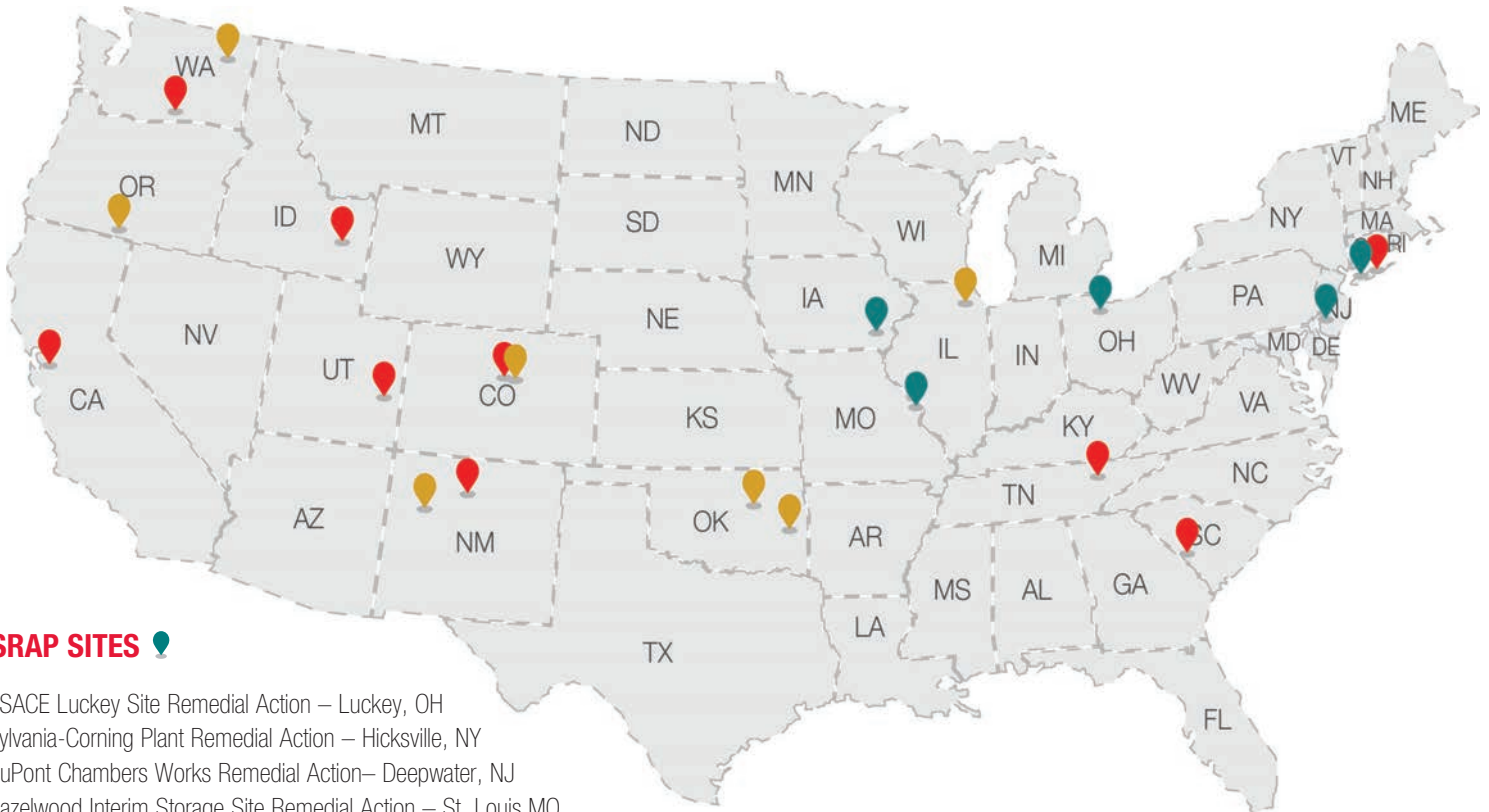

Envirocon is a leading provider of nuclear facility deactivation, decontamination, decommissioning, and demolition (D4) and remediation of radiologically impacted sites for public and private sector clients. As a self-perform contractor, we are able to fully integrate the delivery of both D4 and remediation services. Our expertise in initial project planning, feasibility studies, value engineering, risk and work hazard analysis, and cost estimating provides our clients with a clear and understandable project approach. Our single-source solutions consistently result in lower life-cycle costs through streamlining mobilizations and effectively leveraging personnel and equipment resources.

D4 and radiological site remediation projects present unique implementation, coordination, and safety challenges. These projects may require the coordination of regulations and policies among the Nuclear Regulatory Commission (NRC), the USEPA, other federal agencies, and state environmental regulatory agencies. High profile projects often require coordination with local officials and the public to be successfully executed. Envirocon has the experience to mitigate these challenges.

- ✓ Nuclear Facility Deactivation, Decontamination, Decommissioning & Demolition
- ✓ Waste Management from Point of Origin through Packaging
- ✓ Disposal Cell Construction, Operations & Closure
- ✓ Beryllium Decontamination & Abatement
- ✓ Uranium Mine & Mill Remediation/ Reclamation/Demolition
- ✓ DOE and FUSRAP Site Remediation experience under DOE Orders and USACE Engineer Manual requirements

ENVIROCON RADIOLOGICAL EXPERIENCE

FUSRAP SITES

- ✓ USACE Luckey Site Remedial Action – Luckey, OH
- ✓ Sylvania-Corning Plant Remedial Action – Hicksville, NY
- ✓ DuPont Chambers Works Remedial Action – Deepwater, NJ
- ✓ Hazelwood Interim Storage Site Remedial Action – St. Louis MO
- ✓ Iowa Army Ammunition Plant Remedial Action – Middletown, IA

DOE SITES

- ✓ Atlas UMTRA Uranium Mill Tailings Project – Moab, UT
- ✓ Hydrologic Isolation Trench & Cutoff Wall – Oak Ridge, TN
- ✓ Former Hazardous Waste Management Facility – Upton, NY
- ✓ Hanford Site Remedial Action & Plant Demolition – Richland, WA
- ✓ INEEL-ICDF Complex – Idaho Falls, ID
- ✓ LANL DOE Water Towers at TA-21 – Los Alamos, NM
- ✓ LANL Upper LA Canyon Remediation – Los Alamos, NM
- ✓ LLNL Bldg 321C-Beryllium – Livermore, CA
- ✓ Rocky Flats Environmental Remediation – Golden, CO
- ✓ D-Area Basin Closure Department of Energy Savannah River – Aiken, SC

OTHER RADIOLOGICAL SITES

- ✓ Denver Radium Street Remediation – Denver, CO
- ✓ Midnite Uranium Mine Reclamation Superfund Site – Wellpinit, WA
- ✓ White King/Lucky Lass Uranium Mine Reclamation – Lakeview, OR
- ✓ Kerr-McGee Thorium Remediation – West Chicago, IL
- ✓ Low-Level Radiation Waste Removal – Cushing, OK
- ✓ Demolition of a Uranium Conversion Facility – Gore, OK
- ✓ San Mateo Uranium Site Removal Action – San Mateo, NM
