

Envirocon Announces New President & CEO, Mr. Mark D. Fallon

Envirocon, Inc. is pleased that Mr. Mark D. Fallon has accepted the position of President and CEO. Mr. Fallon assumes the position upon the retirement of Mr. Jack Gilbraith, who served as Envirocon's President and CEO for the past 10 years. Mr. Gilbraith first joined Envirocon in 1996 and was promoted to his current role in 2006.

"Under Jack's strong leadership, Envirocon developed an enviable culture for safety while delivering profitable results as a respected industry leader. While we are happy for him personally, we will miss him and the many contributions he has made to the Washington Companies over two successful decades."

The caliber of Mark Fallon's experience and reputation in the market will continue to provide the leadership Envirocon's customers, partners, and employees expect and deserve. The Washington Companies are fortunate to attract world-class talent focused on safety, customer service, and growth."

- Larry Simkins

President, Washington Companies - Director, Envirocon

Mr. Fallon most recently served as a member of the Board of Directors and President of Global Regions for CH2M, an international engineering company that provides consulting, design, construction, and operations services for corporations, and federal, state, and local governments.

Community Involvement

Employees help build a better future with Habitat for Humanity

Community service and charitable giving hold a special place in the hearts of everyone who works at Envirocon and the Washington Companies. We promote a culture of giving back and believe it is important that employees have the opportunity to spend time in a positive way that benefits the community.

This year, the Washington Companies completed two Build Days for Habitat for Humanity - an international not-for-profit organization that builds houses in partnership with low-income families. The goal of Habitat for Humanity is to eliminate poverty housing in the world. Low-income families help build a home that will become theirs for an affordable price. Since 2010, the Washington Companies have supported Habitat for Humanity in Missoula with volunteers from the Missoula-based companies, including Envirocon, Modern Machinery, Montana Rail Link, and the Washington Corporations. In June, fourteen volunteers, along with other Habitat for Humanity staff and volunteers, spent the day working on two houses.

Volunteers performed a wide range of construction tasks including painting, insulation installation, and stucco preparation while learning new skills and team building with fellow coworkers.

Personnel Updates

Josh Bale, Quality Assurance Manager

Congratulations to Mr. Josh Bale on his appointment as the Quality Assurance Manager for Envirocon. In his new position, Mr. Bale will lead the development, implementation, and ongoing management of quality programs, policies, and strategies that respond to client and industry standards. His primary responsibility will be working with Envirocon

project teams and clients on matters that relate to quality to ensure that Envirocon continues to deliver services that meet our Operational Excellence goals.

Mr. Bale started with Envirocon in 2013 as a Senior Engineer providing technical, financial, and quality control support to various project teams for both the Remediation and Demolition service lines.

Envirocon Welcomes New Project Director

Envirocon is pleased to announce Keith Pushaw as a Project Director for the Remediation Service Line. Mr. Pushaw brings over 30 years of senior project and program management experience, with a strong history of managing complex construction and remedial action projects in remote locations worldwide and

successfully mentoring project managers. His extensive experience includes work on remediation and facility decommissioning projects for the federal government, including the Army Corp of Engineers, Department of Defense, and Department of Energy as well as in the commercial sector. He is skilled at working closely with multiple stakeholders and oversight agencies to safely execute projects and successfully meet client objectives.

Meet Our Team

Frank Sullivan Leads Envirocon Safety

Frank Sullivan serves as the Director of Health & Safety, and is responsible for overall company health and safety operations. Mr. Sullivan has over 20 years' experience in the implementation and management of Health and Safety programs. He is responsible for developing, administering and approving project-specific health and safety plans and related procedures. This also includes responsibility for programmatic project operations related to DOE, Federal Government, and certain clients with similar programmatic health and safety requirements (e.g., LPS, ISM, or FAR/DFAR). He is responsible for supervising health and safety professionals assigned to support projects and programs and provides technical support with regard to project health and safety programs. Mr. Sullivan has a Master of Science degree in Public Health from the University of Utah, and holds board certifications as a CIH, CSP, and PMP.
